I am a student deeply interested in improving human-technology interactions and creating innovative designs. I previously graduated in the top 10 percent of my class in computer engineering and am currently pursuing my master's degree at KTH while also serving as a digital ambassador. With experience as a system support specialist, teacher assistant, and UI/UX designer, my goal is to bridge the gap between design and implementation while continuously enhancing my knowledge in these areas.

Work Experience

Student Ambassador
KTH Royal Institute of Technology Oct 2022 – Current

- Answering questions and guiding students in matters that they require assistance with.
- Providing information for visitors on campus tours.
- Participating in webinars and video content.

UI/UX Designer
Freelancer Jun 2020 – Jul 2021

Worked on several personal projects and designed the interfaces of a few applications and websites.

Skills: User Experience (UX) · User Interface Design · Adobe XD · Figma

Teacher Assistant
Alzahra University Sep 2017 – Sep 2019

- Logic Circuits, Computer Architecture, and Fundamentals of Computer and Programming were subjects I became a TA for several times in these two years.
- Holding exercise-solving classes for 60 students each semester.
- Creating lesson plans, taking tests, and helping with grading the students.
- Explaining hard-to-understand exercises via video guides.

System Support Specialist
Alzahra University Aug 2018 – Aug 2020

- Assisting teachers and students using Al-Zahra university's virtual learning environment.
- Fixing and searching for solutions regarding problems that occurred for users while using Adobe Connect and LMS.
- Making visual guides for users.
